## WEDDINGS

### PETERSON - PEARSON

Mr. Arthur Peterson and Miss Ruth Pearson, very well known in this community, were united in the bonds of holy matrimony by the Rev. G. A. Gunnarsson, at the parsonage in New Sweden, on Saturday, August 6th at one o'clock. The bride was charmingly attired in a gown of white crepe de chine and georgette, and wore the conventional veil held in place with a string of pearls and carried a bouquet of white bridal roses and carnations. The bride was attended by her sister Florence, who wore a dress of shadow lace, while the groom was assisted by Mr. David Berg.

After the ceremony the bridal party proceeded to the home of the bride where a most sumptuous and delicious supper was served to the numerous relatives and friends of the couple. The house was appropriately decorated for the occasion and a profusion of flowers were in evidence. The happy couple were the recipients of many beautiful and handsome presents. The high esteem in which they are held in the community. The groom's gift to the bride was a necklace of pearls.

The happy couple left on the evening train for a short honeymoon, the bride wearing a travelling suit of navy blue tricotie embroidered in contrastive beads opening over a blouse of pearl grey georgette, with a hat of navy blue tulle with white tulle band. They will take up their residence in Angus Ridge district where Mr. Peterson is engaged in farming. They are both members of the Y.P.S. of the Mission Church, and we all wish them the very best of success, and the richest of God's blessings.

### BARSTAD - BRUMPTON

Mr. Ervan Barstad and Miss Edith Brumpton, both of Len Park, Alberta, were united in marriage, on August 6th by the Rev. L. Alexander. The wedding took place at the Criterion Apartments, the home of the officiating minister. The young couple are to visit friends and relatives at Wynne and receiving acquaintances around Wetaskiwin, will make their home on a farm at Len Park. We congratulate and wish Godspeed to the these young and ambitious folks, on their venture.

### HOLTNER - TUSTY

A quiet wedding took place at the parsonage on July 28th when Rev. J. A. Winkland united in holy matrimony Mr. Edward Holtner and Miss Amelia Tusty, both of Wynne. They were unaccompanied. Mr. and Mrs. Holtner will take up their residence on a farm in the Wynne district.

## LAST BASEBALL FOR THE SEASON

The baseball season in Wetaskiwin concluded with games played on Wednesday, and the people of this city are appreciative of the fact that they supplied a good brand of ball this last summer.

The statistics of the team has been using his pencil, with the following results, which are very interesting:

Batting Averages:	
Johnson	215 H 5
A. Dolighan	58 30 263
Godfrey	58 16 275
Campbell	58 21 250
Ryan	59 23 247
Butcher	59 20 222
Harvey	52 17 207
Gaucho	11 170
H. Dolighan	62 7 124
Pitching	
Godfrey	P W L
Butcher	13 8 4
	12 8 5
Strikeouts	
Butcher	81
Godfrey	125
Game Average	
Played 25	Won 16 .640%

### JOHN KNOX U.F.A.

The monthly meeting of the John Knox U.F.A. and U.F.W.A. will be held at the home of Mrs. T. Lahl, on Friday evening July 15th.

## HARVEST WILL BE ON NEXT WEEK

The harvest will be on in this district next week, as many fields are now ready. The first cutting of any account took place on Thursday, of last week when V. E. Thompson cut a field of wheat. Mr. Thompson has the sixteen acres of wheat, twelve acres of rye, and twelve acres of barley in the stock and expects to be cutting on Thursday of this week.

## ADDITIONAL FAIR AWARDS

(Continued from last week)

**Roots and Vegetables**  
 Potatoes, white, 1 peck—Mrs. P. Lucas; 2 Mrs. H. Wood; 2 E. R. Rasmussen.  
 Potatoes, red, 1 peck—1 Mrs. A. Schmidt; 2 Mrs. W. Wood; 2 Mrs. B. P. Dugger.  
 Turnips, Swedish—1 Mrs. Wood.  
 Turnips, Amsterdam—1 H. G. Young.  
 2 Mrs. Wood; 3 Mrs. Dugger.  
 Cabbage, flat—1 W. H. Harie.  
 Cabbage, Winnipeg—1 Mrs. A. Schmidt; 2 Mrs. Dugger; 2 Mrs. C. Boyer.  
 Cauliflower—1 J. W. Harie; 1 Mrs. P. Lucas; 3 E. E. Chandler.  
 Lettuce, 1 J. L. Sommers; 2 C. B. Simpson; 3 Mrs. H. Ward.  
 Carrots, red—1 Mrs. H. Wood; 2 H. G. Young; 3 Mrs. P. Ward.  
 Peas, table—1 Mrs. P. Ward; 2 Mrs. W. Wood; 3 H. G. Young.  
 Mangolds—1 E. E. Chandler.  
 Parsnips—1 H. G. Young; 2 Mrs. P. Ward; 3 E. E. Chandler.  
 Celery—1 W. H. Harie; 2 E. E. Chandler.  
 Tomatoes, green—1 C. B. Rubbin; 3 Mrs. W. Wood.  
 Peas, garden, shelled—1 Mrs. Dugger.  
 2 Mrs. C. Long; 3 E. Rasmussen.  
 Onions, multiplier—1 Mrs. P. Ward; 2 Mrs. W. Wood.  
 Onions, from seed—1 Mrs. P. Ward; 2 Mrs. Wood.  
 Onions, from sets—1 Mrs. P. Ward; 2 P. Lucas; 3 Mrs. Wood.  
 Corn—1 J. W. Harie; 3 Mrs. Dugger; 3 Y. C. Rubbin.  
 Radishes, winter—1 Mrs. Dugger; 2 Mrs. W. Wood.

**Grains and Grasses**  
 Marquis wheat, bushel—1 E. R. Rasmussen; 2 Ed. Schmidt; 3 Mrs. Wood.  
 Spring wheat, bushel—1 E. R. Rasmussen; 2 Ed. Schmidt; 3 Mrs. Wood.  
 Six rowed barley, bushel—1 E. R. Rasmussen; 2 Ed. Schmidt; 3 Mrs. Wood.  
 Barley oats, bushel—1 H. G. Young; 2 E. R. Rasmussen.  
 Oats, yellow, bushel—1 E. R. Rasmussen; 2 Ed. Schmidt; 3 Mrs. Wood.  
 Oats, early variety, bushel—1 Mrs. Wood; 2 E. R. Rasmussen.  
 Collection of native grasses—1 Mrs. H. Ward.  
 Best shod clover—1 E. R. Rasmussen; 2 G. Hunter; 3 Huntingdon farm.  
 Best exhibit alfalfa—1 Mrs. L. H. Newville.  
 Best exhibit Timothy—1 Mrs. H. Ward; 2 Huntingdon farm.

**Farm Products—Special**  
 Largest and best exhibit of farm products—1 E. R. Rasmussen; 2 Mrs. Wood; 3 Mrs. Dugger.  
**Domestic Manufacture**  
 Best wheat flour, Canadian made—Mrs. G. Long.  
 Best tea biscuits—1 C. A. Hunter; 2 Mrs. H. Ward.  
 Oatmeal cookies—1 Mrs. Dugger; 2 C. A. Hunter.  
 Ginger Snaps—2 Mrs. Dugger.  
 Berry Pie—1 Mrs. Dugger.  
 Apple Pie—1 Mrs. G. Long; 2 Mrs. Dugger.  
 Bread, brown, home made—1 Mrs. P. Lucas; 2 Mrs. O. Nieman.  
 White, home made—1 Mrs. W. Wood; 2 Mrs. G. Long.  
 Buns, home made—Mrs. Dugger; 2 Mrs. L. H. Newville.  
 Chocolate cake—1 Mrs. Dugger; 2 Mrs. H. Shure.  
 Layer cake—1 Mrs. Dugger; 2 Mrs. Wood.  
 Fruit cake—1 Mrs. P. Lucas; 2 Mrs. L. Shure.  
 Pickles, home made, 3 varieties—1 Mrs. Long; 2 Mrs. W. Wood.  
 Canned fruit, home made, 3 varieties—1 Mrs. Dugger; 2 Mrs. Wood.  
 (Concluded on last page)

# Pigeon Lake Oil Fields To be Developed at Once

**COMPANY FORMED OF ALBERTA MEN, WHO EXPECT TO START DRILLING OPERATIONS IN SEPTEMBER. SURFACE INDICATIONS ARE EXCELLENT. GEOLOGIST'S REPORT ON THE FIELD IS ENCOURAGING**

Many of the residents of this community have been of opinion for a long time that oil existed a few miles west of the city. The seepages showing oil and gas formations have been on the surface of large areas ever since the land was inspected by white man, and doubtless for generations before. Minor seepages have been held on in this land for years with the expectation that it would be developed, and the hopes of the lessors is at last to be realized. A few days ago the Mutual Oil and Gas Development Company Limited, was approved by the Alberta Utilities Commission with the object of prospecting for oil in this field, and it is expected that the drill will be working about twenty-five miles west of this city early in September.

The company, which is capitalized at \$150,000, has the following officers: President—C. C. Delmage, Broker; Vice President—J. J. McColg Merch.

Secretaries—Sam Smith, financial agent, Edmonton; Directors—C. C. Delmage, J. J. McColg, H. B. Hanson, H. T. Harris, B. A. Reynolds, Thos. Stupis, R. R. Higgins, Fred. Phillips.

The land covered by leases comprises approximately 3000 acres and comprises the following areas, all being in Township 47, range 27, west of the 12th meridian:

East half section 11, North half quarter of Section 11, South half of Section 10, South half of Section 22, West half of Section 16, South west quarter of Sec. 20, E. 1/2 of S.E. quarter of Section 30, South west quarter of Section 29, North half of Section 34, S. half of S.W. quarter of Section 34, South half of S.E. quarter of Section 34, North east quarter of Section 26.

## COMMUNICATION

### AN EXPRESSION OF DISAPPOINTMENT

(We do not necessarily endorse the sentiments advanced by this or any other correspondent under this heading.—Ed.)

I feel a desire to express my disappointment at the outcome of the recent election, especially so because it seems to me that the U.F.A. have assumed the position of speaking for the farmers as a whole politically.

I am sure that as a professional man the farmer has to suffer enough rights both as to his ability and general respect and I as a farmer object to the burden that the U.F.A. have placed upon the shoulders of a large class of farmers in this province. The stigma of being unreasonable, unfair and hypocritical, I object to being misrepresents by this organization, this group. As a member of the U.F.A. I know of the tone of the effort. At our meetings a small discussion takes the form of abuse, of what is, vaguely termed the "big business" and "the interests", and others misrepresent for high achievement.

"We want to stop robbing us," and "we must stop individuality and think as a political or economic group to gain control" says Mr. Wood.

Unfairness and misrepresentation have been characteristic of the U.F.A. since their inception, and has been the ambition of its leaders. Educated by the Grain Growers Guide, and the element within the organization that has the most influence, has been the cause of the trouble. The expression of the set of principles given as the basis of our effort in the last election is pure "humbug" and I feel safe in saying that not more than ten per cent of the U.F.A. voters understood them. And I am sure that

was taken several places where cross-bedding seemed less in evidence and the average was found to be in the direction of 25 degrees east of south. As other irregular dip was found on the south bank of Conjour or Wizard Lake, where a coal seam on the bank of the lake in Section 4, Township 47, Range 27, is exposed. The seam has been worked and shows a dip to the north. These dips tend to show an anticlinal or dome structure between these points. It is impossible to give the extent or exact position of this structure on account of the lack of exposures in the vicinity.

There are also surface evidences of oil in the vicinity. In section 11, Township 47, range 27, intermediate between the two exposures mentioned, there is a big seepage of heavy oil. This has completely saturated the Paskapoo sandstone at this place to a depth of several feet. This oil must seep in from some oil horizon below.

Structurally, the seepages occupy a position on the northeastern limb of the Alberta syncline (May 55a G.S.C.) This position is not generally favorable for drilling as a syncline does not favor the accumulation of oil, and the depths of the producing sands are much greater. The limbs of such synclines however, carry local structures, which may be favorable to this purpose and it was with this object in view that a survey of the field was made.

As in all the fields in Alberta, the rock exposed is the Paskapoo sandstone. The cross-bedding of the Paskapoo sandstone also makes it difficult to obtain the true dip in such exposures as there are. The general dip of the rock here should be to the south-west to conform to the synclinal basin. Irregularities were found in this dip which would tend to show a local structure.

In Section 34, Township 46, Range 27 the rock is exposed along the north branch of the Pieson Creek. The dip

## MR. GREENFIELD HAS SELECTED HIS NEW CABINET

On Thursday, August 11th (today) at Edmonton, Herbert Greenfield, leader of the U.F.A. political party in this legislature, will announce his slate for the cabinet during a conference of the elected U.F.A. members, which will be held at the capital today. Calls are being made for the conference which will commence at ten o'clock, according to a statement by Mr. Greenfield. Immediately after the conference a meeting of the new cabinet will be held, and just as soon as Premier Stewart is ready to hand over the affairs of the province the new cabinet will take possession.

"Not until after the conference has approved of the slate, will I be in a position to announce the personnel of the cabinet," said Mr. Greenfield, when asked when he would announce his cabinet. "Immediately the conference is ended I will make the announcement through the press."

Premier Stewart has already indicated that he is ready to resign at any time. The calls to the conference had to be issued early in order that D. L. Kennedy, member for Peace River, who is located farthest from the capital, might have time to arrive for the meeting.

"After we have taken possession, I expect that he is ready to resign at any time. The calls to the conference had to be issued early in order that D. L. Kennedy, member for Peace River, who is located farthest from the capital, might have time to arrive for the meeting."

## CAUSE AND EFFECT

The world grows smaller every day. Another instance:

The coal strike in England increased the fishing industry in Canada. For the strike made coal scarce and cost \$7. Hence cooking came to a halt. But canned fish require no cooking. Hence 200,000 cases of canned fish have been shipped from British Columbia to the British Isles so far this year.

## GRASSHOPPERS IN ALBERTA

Grasshoppers are still very numerous in part of Alberta. It may appear that these pests are not doing very serious harm. Many people do not realize that when the leaves have been eaten off the plants by grasshoppers the heads on such plants cannot fill, and as a result, the yield of our grain is very seriously reduced. Without grasshoppers are in fields of grain it is certain that they are doing very serious damage. When they have reached a large size and become numerous throughout the fields of grain it is almost impossible to do very much in the way of controlling them.

Prospects are bad for next year and it would seem that every possible means of control must be used in order to effectively reduce the injury from these pests. Mr. H. E. Strickland, in charge of the Dominion Entomological Laboratory, Lethbridge, offers the following suggestions:

We have under observation industries in which summer fallowed crops would have made a fair yield had not countless swarms of grasshoppers come from neighboring breeding grounds which had not been treated and the hoppers remained on them till the middle of September, owing to the habit of the males swimming over the females when the latter are ovipositing, thus giving to the breeding ground the appearance of being covered with small struggling bunches of yellow grasshoppers. Many of the breeding grounds were observed last fall and in a few instances they were reported to us. If the majority of these were located in the fall and reported to you steps could then be taken next spring to see that they receive proper attention. We are advocating such a campaign in our local press, and would offer the suggestion that you try to get the businessmen or any one else who manages the country, to report breeding places, wherever they are. In this manner much of the trouble that will inevitably be experienced next year when the grasshopper pests begin to fly can be reduced.

It is the most sincere wish of the school of agriculture at Oksa to cooperate in every possible manner in any legislative effort to control and exterminate the grasshopper. While the campaign to control grasshoppers during the past few weeks has been somewhat less strenuous than it was in June we are still in the field to assist farmers in any way and would be pleased to receive communications from farmers regarding the control of this pest, and would ask all who are interested in the welfare of the farming community to cooperate in every possible manner in an endeavor to organize so that these pests may be effectively combated.

The suggestions offered by Mr. Strickland are indeed very timely and we would ask that every public spirited citizen act on his suggestions and let us know where they have observed breeding places. P. S. Grisdale, Principal, School of Agriculture, Oksa.

## TOWN TOPICS

For want of a quorum, no council meeting was held on Tuesday evening.

Mr. and Mrs. Chas. Brown returned a few days ago from a holiday trip to the coast.

Mrs. T. P. Hugginson left on Sunday for H. H. River, the guest of her daughter, Mrs. W. J. McGrande.

The new butcher shop on the east side of the track will be opened on September 1st by F. T. Kirstein.

Mr. and Mrs. MacCrosbie who were spending a week's vacation at Sylvan Lake, have returned home.

Mr. and Mrs. F. T. Kirstein and son, Raymond, arrived home on Monday evening from their automobile trip to Wyoming. They went as far as Cheyenne and took in the Frontier Days celebration, returning via Hawlin and the Yellowstone national park. Mr. Kirstein made a quick trip down taking four and a half days on the road. The return occupied seven days from Hawlin, but included stops at several points of interest.

Mr. Fred Alvord and children are spending their holidays with friends at Wetaskiwin.—Hawlin Sun.

## OBITUARY

### EDWIN ALFRED KIRSTEIN

Three passed away in the city on Tuesday, Edwin Alfred Kirstein, son of Mrs. Ehke, at the age of seven years, seven months and fourteen days. He was sick only a short time with diphtheria. The funeral took place on Tuesday afternoon, the interment being in the Wetaskiwin cemetery. Rev. Eiling had charge of the service.

### MRS. MURPHY

On Tuesday of this week the people of Wetaskiwin were surprised to learn that Mrs. Murphy had died suddenly at the home of Mr. Jos. P. Richards. She was aged thirty-five years, and leaves a mother, one son and a daughter to mourn her loss. The funeral will take place tomorrow, the interment being in the Wetaskiwin cemetery at two o'clock. The service will be held in the German Lutheran church.

### MRS. HILLMAN

Another old-time resident of this community was called to her long home on Thursday last week in the person of Mrs. Hillman, who passed away at the home of her son, John, with whom she had been residing. She was aged eighty-three years, and the remains were taken to Leduc on Saturday for interment.

### MRS. FREIMANN

After an illness of some time with cancer, Pauline, the beloved wife of Mr. Carl Freimann, of the Richards district, passed away on Friday last. She was aged fifty-two years and eight months, and was a native of Poland. The funeral took place on Sunday last, Rev. Eiling officiating.

## TOWN TOPICS

Wm. Gibson left a few days ago for Toronto, and other places in the east on a visit with friends.

Mrs. Alfred Rodell and Mrs. A. Cummings were at Daysland last week since the work was done, claim that they are on a holiday trip.

A. S. Watt returned home from Calgary the first of this week and is improving nicely after an operation for throat trouble.

Mr. and Mrs. Alexander of Michican arrived in the city a few days ago to spend some time visiting Mrs. Alexander, who is in the city, and Mr. and Mrs. W. Stiellet.

Prof. Alexander left last week to spend a few days in the city. He is in the east. He will go to Michigan, Ontario, and as far south as Tennessee.

The friends of Cecil Richards are glad to learn that he is convalescing nicely after a serious operation for appendicitis, which took place at the Wetaskiwin hospital last week.

The work of grading the main trunk road between Wetaskiwin and Hitter Lake was completed this week, and those who have passed over the road since the work was done, claim that a first class job was made of it.

Mr. and Mrs. Alfred Nelson, who have been visiting relatives in Sweden returned home a few days ago. They had a delightful time, but are glad to return to Wetaskiwin, and to renew the acquaintance of their many friends there.

The results of the examinations in the theory of music, which were conducted by the Royal Academy of Music one week ago, were received recently, and the three pupils of Mrs. MacFarlane were successful in passing with credit marks, namely, Morgan French, Arletta Kallier and Olive Lawson.

Mr. H. Nelson, professor of geography of the university of Lund, Sweden, was in the community last week on a number of the Scandinavian news, and was getting first-hand information as to conditions in the district. He is studying the methods of immigration in Canada, and will make a report to the government upon his return. He took a trip through the country in company with J. P. Johnson, school teacher at Wetaskiwin, and was very well pleased with what he saw.

## MARY JANE PLAYS UP

She had made herself very comfort-  
able, a thing which obviously no one  
else was doing. For the July afternoon  
sun was hot and the air was crowded.  
Through open windows, at which pas-  
sengers passed, added a constant cloud  
of eluders, which settled into the per-  
spiration on people's faces and gave them  
strange completions.

It was then something more than a  
feat that Mary Jane Sherwin had ac-  
complished in making herself feel com-  
fortable and looking so. That Mary Jane  
know how to travel and was ac-  
customed to heat. Eight years of Cal-  
ifornia had made her ready for any  
sort of a day, and more years than  
that spent in teaching large classes in  
biology and chemistry had trained her  
intelligence and self control.

Her dark blue serge suit and thin,  
white silk blouse had a crisp, un-  
creased look. Her black hat was small  
with a smart bow and graceful veil.  
She wore no jewelry, no scent, no  
powder and her dark hair was smooth.  
Eight years of sunshine had given her  
fine skin a healthy tan which was  
rather becoming than otherwise, for  
Mary Jane had clear dark eyes, be-  
hind glasses, however, and red lips  
and white teeth, and what was best of  
all perhaps, a bit of color in her cheeks.  
With her curly short feet at rest and a  
magazine in her hands she appeared to  
be quite unconscious of the heat about her.

But even she read an interesting  
and cooling article on the north pole.  
Mary Jane's mind leaped ahead in  
little joyous spurts toward Killawog  
and what she would find there during  
her visit to Lucy Perkins. It was at  
Lucy's invitation that she had come all  
the back track east in July after she  
had spent the summer on houseboat with  
the Vaughns on Hitter Water. She  
Vaughn's brother, Ronald Warman,  
had been pleased to see her and dis-  
appointed when she had disappointed  
him. She played with the thought of  
Ronald Warman as she turned a page  
leisurely. Surely he was as nice as  
any woman might want a man to be.  
It was dreadful that she could not care  
for him, still more dreadful that she  
had that old-fashioned notion that a  
woman should care greatly for the  
man she married.

"Perhaps absence will make the  
heart grow fonder," Mary Jane  
thought. "Well, at least, he'll be there  
when I get back so there's no use in  
worrying. And in the meantime, I  
shall have my summer at Killawog.  
Dear old Lacy! I'm glad she asked me,  
for I would never of thought of going  
if she hadn't. Her invitation had the  
effect of connecting me up with the  
old place again, but I'm speaking as  
if I were a telephone wire." Mary Jane  
smiled and resumed her reading.

Two minutes later she became aware  
that a new note of discord had entered  
the scene about her. She lifted her  
head. In the back of the car a very  
small baby was crying wretchedly in  
an effort to suppress some grievance.  
Somebody was looking around with  
reproach on their faces—all but one  
man, with rather big shoulders and a  
nice back to his head, who sat in the  
back seat. He went on reading and  
Mary Jane concluded to do the same.  
But presently even the man with the  
nice back to his head began to get  
uneasy. The baby was crying now in  
a strange surly way that betokened  
despair more than exasperation. Mary  
Jane deliberately turned and looked  
back of her.

In the back of the car sat the couple  
who owned the baby—a fat, stupid man  
and a delicate wisp of a wife, half his  
age. The man was balancing himself  
in the aisle while he struggled with the  
clasp of a travelling bag. His stupid  
face was scarlet. He opened the bag  
and took out a bottle of dark stuff  
and began to pour the liquid into a  
spoon.

THEY REACH  
THE KIDNEYS  
THAT IS WHAT

DOAN'S  
KIDNEY PILLS  
DO!

They are just what their name implies: a  
pill for the kidneys, and the kidneys only.  
Mr. Mason, 540 Jones Ave., Toronto,  
Ont., writes:—"It is with great pleasure  
I tell you of the relief I have had since  
using Doan's Kidney Pills. I suffered  
from terrible backaches and headaches,  
and could not get through my house-  
work without sitting down. One day,  
while I was resting, a friend came in  
and I told her of the terrible weak-  
ness I had. She advised me to get your  
pills, which I did. They gave me great  
relief, and now I am well and strong."  
Price, five a box at all druggists or  
mailed direct on receipt of price by The  
T. Milburn Co., Limited, Toronto, Ont.

Mary Jane's quick brain guessed the  
whole situation. They were going to  
quit the baby with that horrible look-  
ing, lacerated face. He looked rebellious  
against such gross ignorance. For,  
though she was an old maid and had  
never had any acquaintance with hu-  
manity other than boys and girls of  
15, she was full of that primal in-  
stinct which makes any woman a  
mother first of all things.

The imagining slipped out of her  
hands and the man with the nice  
head turned to pick it up for her. But  
Mary Jane was unaware. She had  
started to her feet with one idea—to  
get into the back of the car in time  
to save the baby from what the spoon  
contained.

Swiftly, with perfect balance, she  
flushed down the car, and as the spoon  
touched the exhausted baby's open  
mouth her hand gently arrested it by  
falling upon the man's arm. "Alight  
it not be a pin?" she queried in her  
most persuasive tone. "Won't you let  
me see?"

"I'm sure I shall be glad" the mother  
said as she handed the baby over. "I  
don't know what makes her so cross  
I'm tired out and Joe don't have a bit  
of patience. I tell him he's too old to  
be the father of a baby!" Tears rose  
to her eyes.

Mary Jane had turned the baby over  
her shoulder, while with deft touch she  
unloosened and took away enough of  
clothes to sweat an Eskimo. She  
dipped her handkerchief in ice water at  
the cooler and bathed the hot little  
face and head and hands. Then, as  
quivering mastery of the situation, as  
the baby's cries grew fainter, she  
skillfully emptied the spoon, washed it  
and instead of the poisonous liquid  
a few drops of the cold water into the  
tiny mouth. The baby looked up at  
her during this process with amazed  
eyes. The whole car watched, the par-  
ticular man most of all.

Mary Jane sat down, laid the baby  
on her lap, bared its feet ran her  
fingers about, scratching its pins and  
was rewarded by a dimly smiling face.  
Somewhere from the back of her con-  
sciousness came an echo and she  
hummed it while she soothed her knee  
gently in a rocking measure. In five  
minutes the baby was asleep.

"Ain't it wonderful?" murmured the  
mother unconprehendingly.

Mary Jane's eyes and mouth were  
stern. "Not at all," she said, forcibly.  
"You were simply repeating the little  
thing. How would you like to be  
suffering from the same ailment as a day  
if this baby could have talked she  
would have soon told you what was  
the trouble. But she couldn't so she  
cried. You didn't understand her lan-  
guage, that is all," she added ap-  
parently, with her flashing smile.

"I guess you're right," said the  
mother lamely as she received the  
peaceful baby.

"And one thing more," Mary Jane  
spoke gently but very firmly. "Let me  
be sure of you that you will throw that  
bottle of stuff away, may this instant  
before you're tempted to give your  
baby any more of it. Will you? Will  
you let me do it for you? She held out  
her hand the personality that was  
able to control and command sixty  
different sorts of humanity at a time  
compelled the man to slowly pull the  
bottle out of the bag and place it in  
her hand. Mary Jane smiled and placed  
the trophy of her common sense out  
of the window. Then she went  
back to her seat.

The man in the seat ahead was wait-  
ing for her, and his face was every bit  
as nice as the back of his head. "I  
beg your pardon, Miss Sherwin," he  
began.

She didn't know him, then the memory  
Mary Jane looked up. For an instant  
of the Perkins tennis court and many  
an incident back there flashed upon  
her. "Oh, it's Cort Wheeler!" she  
cried, holding out her hand.

She made room for him and he slid  
into the seat beside her. "You're go-  
ing home to Killawog?" he question-  
ed, anxiously.

"For the summer, to stay with Lucy  
Perkins."

"Then—" He paused, smiling in  
secret over the rest.

But Mary Jane found out what the  
smile meant later. As a matter of  
fact she cancelled her contract about  
three weeks later and decided that  
California and Ronald Warman would  
have to do without her in the future.

ALBERTA WOOL CROP  
SAME AS LAST YEAR

Sixty cars of wool have gone forward  
to the Canadian cooperative woolgrow-  
ers at Toronto, from the Southern Al-  
berta woolgrowers association so far  
this season, and seven more cars are  
mainly to be consigned. The total ship-  
ments last year were 65 cars so that  
the clips of both years are about the  
same.

About 100,000 lbs of southern Al-  
berta wool has already been sold, but no  
estimate has been made yet of the av-  
erage price. The grading has been  
somewhat better this year than last it  
is stated.

Argument is divided among sheep  
men as to whether the new method of  
having all the wool graded in Toronto  
is better than the old method of hav-  
ing a government inspector come west  
to do the grading.

is the best remedy  
known for sunburn,  
heat rashes, eczema,  
sore feet, stings and  
blisters. A skin food!

All Druggists and Stores—50c.

GIRL'S STATE-  
MENT WETASKIWIN

"Many women" will profit by the  
following statement of one of their sex:  
"I was afraid to eat on account of  
stomach trouble. Even rice did not  
agree. After taking Adler's I can  
eat anything." Adler's acts on  
BOTH upper and lower bowel, remov-  
ing foul matter which poisoned stom-  
ach. EXCELLENT for gas on the  
stomach or sour stomach. Guards  
against appendicitis. It brings out  
poisonous matter you never thought  
was in your system. Northern Drug  
Company.

ALBERTA GOVERNMENT  
EMPLOYMENT BUREAU

A Bureau for the City of Wetaskiwin and District has been opened in Wetaskiwin with Evert E. Sparks, secretary of the Municipality of Montmorency, in charge.  
Employers are requested to make their requirements as far as possible known to the Bureau, so that the Bureau may be able to place persons in positions of interest to them. The Bureau is also a place where persons can find out about the various opportunities open to them in the various branches of the Government and in the various industries of the province.

Miss Valburga A. Greiner received word from the department of education this week that she was successful in passing her examinations in the work of grade XII this year. We join in extending congratulations.

Constipation  
THE CAUSE OF  
MANY ILLS.

Constipation is one of the most frequent, and at the same time one of the most serious of the minor ailments to which mankind is subject, and should never be allowed to continue.  
A free motion of the bowels daily should be the rule of every one as it is of supreme importance to health that the bowels be kept regular.  
Keep your bowels properly regulated by the use of MILBURN'S

and you will enjoy the very best of health.

## CONSTIPATED

Mr. Edward Hopkins, Fenwick, Ont., writes:—"I have used Milburn's Liver Pills for constipation, and have found that they did me a lot of good." Price, 25c a vial at all druggists, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

## The Totems At Alert Bay

A pleasant run on the Alaska route, a summer holiday by water from Vancouver brings one to Alert Bay at the north end of Vancouver Island.

At Alert Bay are to be seen the Totem Poles and Indian Community Houses and the remains of the curious tree-burials, popular till recently with the Sitkwhas.  
The Totems here have long since come to be regarded as one of the wonders of the world as inscrutable in their way as Pyramid and Sphinx. And so it is little wonder that not a week goes by, in summer, but groups of visitors from every corner of the Globe who are bent landing here from both North and South-bound boats to view at close hand these "Sphinxes of America."

The world has always had wood-carvers. But never anywhere at any time "carvings" like unto those of the Alert Bay Totems.

The outstanding points of the totem, which strikes the visitor abashed for a few hours, are overwhelming.

One question: Who carved them?

Who conceived the idea?

We know it was not till very lately that the Coastal Indians possessed any steel tools. How then was it possible so long ago for them to cut deep enough a line as here gives decision to the totem-face?

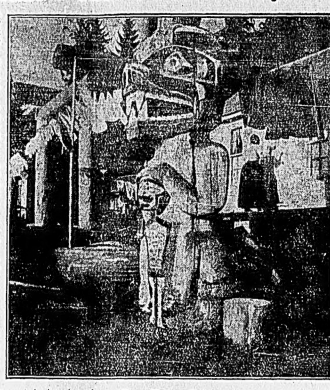

These questions, and hundreds of others of like nature, after all these years since first the Totem was discovered by the white man, still remain without a definite answer. It is more than the human charm of the Sphinx that she has never spoken. Indeed, half the charm and spell woven of the Totem lies in the stories that every visitor, beholding them, is free to weave to fancy, aided and guided by Tradition.

For though the written word may be wholly lacking "Tradition" has many a story more prettier than fact, clinging like graceful draperies trailing off in to these Northern myths, has about these wooden figures of the wonderful Totems, that swirl around the shoreward at Alert Bay.

Here is that marvelous figure, the Thunder Bird, with its eagle-eye and beaked head that drops open through which entrance was made to the feast-hall in times of Potluch.

Tradition has been busy with the Thunder Bird. Something about it makes it "the king of the Totems."

The story of the Thunder Bird that lets most light on the Indian character of other days is a genuine tale of treachery on the part of the

## Bear Totem Pole.

Alert toward their ancient foe the tribes of the Nimpkish. The Nimpkish folk were invited to a "Potluch" and baring the hatchet, they came. Only to be murdered one by one as they wriggle through hall. The entrance was so narrow and the blow from within so swift and unexpected that not even a sound came to death every Nimpkish who came to the feast.

Next in importance to the Thunder Bird comes the Bear, frank-eyed and sporty, carrying between powerful jaws the "copper" symbol of Chiefdom among the Indians to this day.

The child whom the Bear symbolizes was evidently a hunter—preeminently of bears. And so cleverly did he hunt and study Bruin's habits that in time he himself came to have something of the nature of the animal he hunted. The whole make-up of "The Bear," longish, genial and good-humored. No one could think of him giving The Potluch that annihilated the Nimpkish.

As a true sport, every visitor to

Alert Bay will acknowledge that "The Whale" runs "The Bear" a close second.

And as you look at the harpooner conceived of the artist astride the giant sulphur-bottom you know that whatever may have been the fault of this scion of the house of Sitkwha "cavalier" was not one of them. Of all the steeds of fancy or ambition can be imagined that supplies your Coastal. One of these arts was evidently not afraid to ride.

Indeed, is the simple whale design which spares as wholly unnecessary the written word, mounts guard over time-worn mound in the graveyard. To a novel reader of these arts is remaining interesting. Totems in the Alert Bay gallery. It is desirable that yourself make the trip. Otherwise you are altogether lost the unique pleasure of piecing together the puzzle of "designs" shown in the Totems and making them into the living chapters of the life that at one time had its being here in this part of our Canada.

FARMER COULDN'T  
GET HIS SHOES ON

FEET WERE DREADFULLY SWOLLEN WITH RHEUMATISM—TANLAC ENDS TROUBLE

"I've found the right medicine at last. Give me a bottle of Tanlac please," said Joseph Reszka, a farmer of Grunthal, Minn., as he approached the counter in Liggett's Drug Store, Winnipeg, the other day.

"Tanlac is the one and only medicine I ever tried that does what they say it will do. Four years ago after an attack of grippe followed by pneumonia, I was a rickety, lost my appetite and although I ate only the lightest foods, I suffered agonies afterwards. I had to move the matter worse, then a year ago rheumatism got hold of me and my ankles began to swell and my knees got stiff. Many a morning I was unable to get out of bed. I couldn't put my boots on my swollen feet and my ankles began to ache, and often I couldn't even stand up."

"For weeks at a time I couldn't do a lick of work on the farm and just hobbled around as miserable a man could be. Nothing helped me, although I tried everything I ever heard of. If I hadn't gotten hold of Tanlac when I did I don't know what would have become of me. I'm like a new man now. I've got a big appetite, my digestion couldn't be improved upon and I have gained ten pounds in weight. The rheumatism has been entirely driven out of my system and I haven't an ache or pain."

"I am buying this bottle now not because I need it, but I want to have it handy if anything should go wrong with me. I never intend to be without or Tanlac."

Means Comfort and Economy  
in Home Heating

Every room glowing with comfortable circulating clean warmth, fuel bills cut 25% to 50%—the dirt, drudgery and danger of stove heating banished forever—that's what the Findlay Pipeless system means in farm or city home.

The Findlay Pipeless heats by natural circulation of air through one register. This air circulation system, besides assuring a comfortable temperature throughout the entire house, keeps the air pure, clean and moist at all times. Your cellar, however, remains cool, allowing storage of vegetables, etc.

You do not need to tear your house to pieces to install Findlay's Pipeless Furnace—you can do it in a day without expert help and without disturbance to the household.

Send us the attached coupon, filled in as indicated and we will mail you literature fully describing this unique pipeless heating plant.

## "JUSS" Is Not Made By A "Professor"

or a self-styled scalp specialist, the public has been imposed upon to long with worthless preparations put up with the sole idea of getting the money and getting it quickly.

The formula for "JUSS" was perfected by two Calgary druggists after ten years of laboratory tests in an effort to discover an agent that would kill the dandruff germ without injuring the hair in any way. They were successful two years ago, when it was first offered to the Calgary public.

Since that time "JUSS" has been sent into nearly every town in Canada and letters are coming in from all points telling us what wonderful results people have got from its use.

"JUSS" (Harrison's special hair tonic and dandruff eradicator) is absolutely guaranteed to kill dandruff (no matter how long standing) stop falling hair and promote a wonderful new growth, if it fails to give you complete satisfaction, you have only to return the empty bottle to the druggist from whom you purchased it and receive your money back. Could anything be fairer?

"JUSS" is the biggest selling preparation on the Alberta market today, everybody who has used it is enthusiastically boasting it to neighbors. Do you think any ordinary hair tonic would cause such a sensation?

Forget the countless times you have been stung with worthless hair tonics and get your bottle of "JUSS" today—you'll thank us later for telling you about it and remember—it is guaranteed.

All Wetaskiwin Druggists sell "JUSS" \$2.00 per bottle (a full month's treatment).

LOOKING  
BACKWARD

(From the Times 20 Years Ago)  
(August 2, 1901)

A largely signed petition has been sent to the postmaster general praying that a post office be established in township 20, range 45, with John Spoket as postmaster.

Extensive improvement is going on around the school house this week. The grounds are being levelled and a handsome picket fence is being constructed along the front, and a board fence will be erected along the sides and rear.

Fifteen tickets were sold here on Saturday to parties intending to take in the Western fair.

At a meeting of the Business Men's Association, of town held Thursday in Herie's hall, for the purpose of discussing the advisability of endeavoring to secure a market for the immense out crop of this district, a resolution was passed to be forwarded to the minister of agriculture at Ottawa praying that he use his influence with the British government to secure a market in South Africa. Other towns in the west passed similar resolutions.

The Duhamel school will open on September 3rd with Miss Barbara Middleton of Medicine Hat as teacher.

The Millet correspondent says: "The map of our village will soon be out and then we expect to see building after building erected and our town a rival of Wetaskiwin."

(From the Times 10 Years Ago)  
(August 4th, 1911)

The work on the new Burns block is fast nearing completion, and the manager expects to take possession in a few days.

P. Burns announces he will this year commence the erection of a packing plant in Edmonton which will cost \$250,000 and the site will be near that of the Swift Co.

The railways have been asked to allow the extension to Alberta of the \$100,000 harvesters' excursion from Ontario.

Smith & Poiré have started the manufacture of Crispettes, a delicious preparation put up in packages in a wholesale way at their rooms on Lorne street.

The dogs in the southern part of the city cornered a beaver, which was defending itself by standing on its hind legs and hitting the ground ferociously with its broad tail, and the crowd followed with its front feet.

O. H. Johnson is opening up in the general mercantile business at Edson. The applications of Miss Bernice, of Calabash, Ont. Miss McWilliams, of Nova Scotia, Miss Hilde, of Calgary, and E. B. Asselstine of Dayland have been engaged by the public school board.

The first kiln of brick burned by the opened last week and proved to be of the finest quality.

Wetaskiwin defeated the Edmonton Wholesalers' baseball team by a score of 16 to 3.

L. E. Martin left Camrose last Monday continuing his tour after a four weeks' stay here. He came up by way of the coast and is returning to California by way of Minneapolis and the Eastern States. Mr. Martin said conditions here, while not so rosy as during the past few years, were very much better than at other places he had been. He intends making another visit to Camrose the latter part of September, and then will likely stay a couple of months—Canadian.

HATFIELD TO STAY  
AT MEDICINE HAT

Rainmaker Cuts Down Bill This Year to \$5500; Signs Contract for Next Season

Medicine Hat, August 6.—The farmers in this district still have faith in the powers of Charles M. Hatfield, the rainmaker. This was made manifest today when at a meeting of the United Agricultural association it was decided to engage Hatfield's services for next year.

A new contract was agreed upon in which three inches of rain are allowed for natural precipitation during May, June and July, 1922, and Hatfield will receive \$4000 an inch for every inch over three inches and up to six inches. Although entitled one maximum of the maximum amount to be paid being \$5000 under his contract for this year the rainmaker reduced the amount by \$2500, stating that in view of the somewhat disappointing results of this year's operations he would be satisfied with \$5000. He explained his partial failure as being due to the fact that the location chosen by the association at Chapin Lake was unsuitable owing to the prevailing north west winds in this district. Under his new contract he will choose his own site and is expected to locate about 60 to 70 miles northwest of the city.

## FEELING PRETTY SMALL

Here's a good one an exchange hands out—One day a preacher of our country was out hunting and during the day he had storm come on. In order to keep dry he crawled into a hole low down. As the rain got worse the bug began to swell and our brother could get neither way. He really thought his end had come, and he thought of all the wrong he had done. And when he recalled that he had gone off on a vacation without paying up his newspaper subscription, he felt so small that he crawled right out of the log without difficulty.

STEAMER STRUCK  
REEF AND SANK  
IN 15 MINUTES

Tourists on Board from Portland and San Francisco; Rescue Boat Arrives Shortly After Disaster

Barbora, Cal. Aug. 7.—The steamer Alaska of the Portland and San Francisco line struck Hinch's Reef, 40 miles south of here in a fog last night and sank within 15 minutes. She carried 121 coastwise passengers and a crew of 50. It is feared many of the passengers and most of the crew are lost.

Hinch's reef is four miles from the shore. It offers no landing places for the survivors of the wreck and the shore itself is rocky and difficult of access. As far as can be gathered, the Alaska slipped off the reef after striking, and overturned before sinking. Mournful moans of the passengers had been put off in the ships boats. The first ship to reach the spot after picking up 30.8.5 calls was the Janya, of Vancouver which reported she had picked up two boatloads of the passengers and was scouting the foggy seas for more.

None of the passengers registered at the shipping company as having come from Canada. Most of them were tourists from Portland and San Francisco the Alaska's principal ports of call.

WHOLE FAMILY  
IS WIPED OUT  
BY 'MUSHROOMS'

Winthrop, Ariz. 5.—Five persons are dead at Shaverton, near Tumbler City, Ariz. as the result of eating poisonous fungi in the belief that they were mushrooms, according to word received here.

"The deaths were not an entire family, consisting of Fred Huska, his wife and three children, the only survivor being a six months old baby. The tragedy was practically complete before neighbors knew that sickness had touched the family, and when help arrived it was too late to save the father, who was the last to succumb.

The story, as it could be gathered from the almost incoherent utterances of the sick man, was that the mushrooms, or what they took to be edible fungi, were gathered by the children on Sunday, cooked and eaten. The first death occurred on Monday. Another child died Tuesday, and by this time all the members of the family were suffering from the poison and unable to help themselves.

## LOCAL CROP CONDITIONS

The Calgary Herald on Saturday, after the following reference to Wetaskiwin's crop conditions:

On account of the uneven crops in this community it is difficult to strike an average yield but it is estimated that wheat will run from fifteen to eighteen bushels; oats about twenty bushels, and barley twenty bushels to the acre. No flax is grown here.

The prospects are for a much bigger yield this year than last as the hail storm of last year covered a big area and the feet are short and the farm-

C. W. GILLET COMPANY LIMITED  
TORONTO, CANADA

Montreal, August 5.—Five hundred men left tonight for the west to work on Canadian Pacific railway section gangs. A notice asking for this number of hands was posted outside the employment office near the station last night, and resulted in a regular riot, so eager were the hundreds of desperate men to secure work of any sort. The great mob surged through the doors into the offices and gave many people the impression that the unemployed had taken matters into their own hands and were rioting.

## HAD RHEUMATISM FOR FIVE YEARS

No Return of the Trouble Since Taking  
"FRUIT-A-LIVES"

MR. JOHN E. GULDERSON

P. O. Box 123, Parkman, N.S.

"I suffered with Rheumatism for five years, having it so badly at times I was unable to get up without assistance. I tried different medicines I saw advertised and was treated by doctors in Amherst, also in my home town, but the Rheumatism came back. In 1916, I saw an advertisement that 'Fruit-a-lives' would stop Rheumatism, and took one box and got relief, then I took them right along for about six months and the Rheumatism was all gone and I have never felt it since.

Anyone who would care to write me as regards 'Fruit-a-lives' I would be glad to tell them what 'Fruit-a-lives' did for me."

JOHN E. GULDERSON,

Contractor and Mason.

DISCOURAGING FOR

THE THIRTY ONES

Premier-Designate Greenfield Pledge

Real Attempt to Enforce

Liquor Laws.

Edmonton, August 8.—The halcyon days of a "wet" Alberta, with liquor and lots of it easily obtainable for all and sundry who wish to slake their thirst, are over and gone, as an interview between Premier-designate Greenfield and H. H. Hall, general secretary of the Alberta social service league, on Wednesday, can be taken as indication of the likely trend of affairs when the "farmers' government" takes over the reins.

"The interview was most intimate," said Mr. Hall, and "the promise was given that an attorney general will be in full sympathy with the proposition, and who will see that the Alberta liquor act will be enforced with the greatest vigor."

"I don't look for a bone-dry Alberta," added Mr. Hall, "but the new premier promised a genuine effort to enforce the law, and to prohibit the sale of liquor in the Farmers' markets, and the fact that forty members of the new legislature have gone on record as being in favor of prohibition, is sufficient to suggest a decided change in the administration of the liquor laws."

### 'A Great Success.

The Wetaskiwin Exhibition is over for another year. It was a great success and deservedly so. The annual fair performs a very useful function to the life of the community. They are an educational institution designed to encourage the development of the highest grade of stock on our farms; the best types of grain in our fields; and the best kind of work in our homes. They enable a people of a community to get together to share their ideas and to foster that community spirit which is so essential to the well-being of a district. Observation is one of the best means of learning, and the fair is the best of the kind in our district. The interest displayed on the first three days of last week, the citizens of Wetaskiwin, is a tribute to the fair which was useful. The interest displayed in the exhibition by the younger generation is commendable, and should be doubled, and will be further encouraged by the fair, for the benefit of the community, can congratulate ourselves on our annual fair and exhibition. Our fair is second to none on the circuit.

ALBERTA, LIVESTOCK

HAS DEPRECIATED

TWENTY MILLIONS

Partners and livestock raisers in Alberta during the past two months, since the United States emergency tariff was imposed on cattle, have suffered a depreciation of over twenty million dollars in the value of their cattle as a direct result of that measure.

George Lane, the veteran cattle man of Alberta, told the Calgary board of trade on Wednesday that he had estimated that the livable jump which must follow the tariff embargo by the States would result in a loss of \$10.00 per head on all cattle in Canada. The Morning Herald, in investigating the situation, has found that the depreciation amounts to the sum of \$15.00 per head, and at any moment this may be increased.

The receipts at the Alberta stockyards are very light at the present time and will continue to be so until after harvest operations, but immediately after harvest the heavy run of grass fed cattle will commence, and without any outlet other than local consumption, prices are seriously threatened. Outcast cattle are considered highly undesirable for shipment to Great Britain and other European markets.

A census of cattle in Alberta is taken by various interests each year, and while the figures are not official, such as the government, come in on June, they are considered highly reliable. The following figures are taken from a report issued by the United Bank of Canada.

1910 672,700

1915 643,754

1917 1,535,284

1918 1,591,452

1919 1,554,644

1920 1,352,590

POWERFUL SOLVENT Discovered

The golden dream of the alchemist of old was to discover a solvent which would dissolve metals, wood, stone, earth, minerals, in fact every solid thing. A new liquid which will partly realize this dream is described in The American Scientist, by Dr. Lehmer, professor of chemistry at the University of Wisconsin.

"Tests have shown that selenium oxychloride, as the solvent is called, dissolves rubber, glass, enamel, dicrochroms and many other substances which hitherto have been regarded as most resistant to all chemical agencies except fire.

"Such products as pyramidal, halite and condensate, which are used as substitutes for amber in the making of tobacco pipes and for many other industrial purposes and have been in use for many years, are now regarded as insoluble in all known solvents are readily dissolved by selenium oxychloride, according to the announcement of Dr. Lehmer. My its ordinary paints, varnishes and shellacs can be removed from furniture and carriages and other articles without injuring the wood and enamel. It can be taken from automobiles completely without affecting the steel body.

"His solvent properties are so vigorous said Dr. Lehmer that it will remove the bitumen from soft coal, but will not attack the pure carbon or anthracite. The element chlorine in the gas rack, he demonstrated, can be activated by this new reagent by treatment at ordinary temperatures, which is a considerable advance over the old steam activation at a white heat.

"The use of activated charcoal in the extraction of gasoline from natural gas in which it is interesting chemistry, today, as it will tend to increase the supply of fuel for motor vehicles, and still leave the gas available for household and industrial purposes.

During last Tuesday's electric storm the female building at the hospital was struck by lightning. The lightning knocked out of the corner of the building, but otherwise no damage was done. In town, the residence of W. Cottle was also struck.—Ponoka Herald.

## EXPERT TELLS WHY MOTORS HAVE MORE POWER AT NIGHT

Speaking in a general sense a motor ought to run better at night than in the daytime. Whether it does so or not has been a matter of argument between motorists ever since motors existed, and one really numerous column of discussion that lasted for several years in almost all the magazines on automobiles.

Really the thing is very simple, says that engineering authority, A. Lindell Clayton, in the current issue of Motor Life. One is liable to forget that two things are burned in a gasoline motor, gasoline and air. Neither can burn without the other. Also to get the best and most powerful combustion the proportions of gasoline to air cannot vary very much. To one cylinder full of air so much gasoline and no more can be added.

To one cylinder full of air. What is a cylinder full? The answer is that it depends what you fill it from. Every body knows that when driving in very high altitudes, the rarefied air causes a noticeable loss of power; anyone who have driven at 5,000 feet elevation cannot fail to have observed this.

Really the thing is very simple, says that engineering authority, A. Lindell Clayton, in the current issue of Motor Life. ## ROYAL MARKET NEWS

## A SUGGESTION!

Phone your Sunday order in on Friday. By so doing you get a better selection.

Orders coming in late on Saturday often receive scant attention through no fault of the order clerk, but lack of time caused by the extra pressure of business on that day and it often happens that your particular cut has been sold, and you have to take a substitute which causes disappointment.

## THE DELIVERY PROBLEM

Frequent deliveries over the same route are costly. A little co-operation on the part of the consumer, recommended by a Consumers' League, would help to reduce the cost of this service. The members are instructed to so plan their orders that but one delivery a day is required.

TIMES ADVERTISEMENTS BRING RESULTS

## CAMPING IN COMFORT

All the comforts of camping, with none of the drawbacks of having to prepare meals, etc., can be enjoyed during a visit to one of the Canadian Pacific camps located on Lake Wapiti (Hector station near Lake Louise) or Lake Windermere, B.C.

There appears to be some misapprehension as to these camps, for they do not consist of tents, but of log or rustic cabins for sleeping quarters, with a central Club house containing combination dining and living room and necessary kitchen facilities.

There is accommodation in each camp for fifty people and the locations are ideal for anyone wishing to enjoy a quiet holiday in the great outdoors, where hiking, fishing, hunting, etc., can be indulged in to the heart's desire.
